

INDEX OF PUBLICATIONS ON THE CD

D.G. KRIGE

1. **DGK01**

A statistical approach to some basic mine valuation problems on the Witwatersrand - *J. of the Chem. Metall. and Min. Soc. of S.A.* December, 1951. (**Volume 1...1**)

DGK01b

Discussions and replies March, May, July and August 1952. (**Volume 1...2**)

2. **DGK02**

A statistical analysis of some of the borehole values of the Orange Free State goldfield - *J. of the Chem. Metall. and Min. Soc. of S.A.*, September, 1952 - discussions and reply November 1952, and February 1953. (**Volume 1...3**)

3. **DGK03**

A study of the relationship between development values and recovery grades on the South African goldfields - *J.S.A.I.M.M.*, January 1959, - discussion and reply April and October 1959. (**Volume 1...6**)

4. **DGK04**

On the departure of ore value distributions from the lognormal model in South African gold mines. *J.S.A.I.M.M.*, November 1960, January and August 1961. (**Volume 1...8**)

5. **DGK05**

Statistical Applications in Mine Valuation. Parts 1 and 2 - *Journal of Inst. of Mine Surveyors of S.A.*, June and September 1962. (**Volume 1...12**)

6. DGK06

The application of correlation and regression techniques in the selective mining of gold ores - *2nd APCOM Symposium, University of Arizona, Tucson, April 1962. (Volume 3...3)*

7. DGK07

The significance of a limited number of borehole results in the exploration of new South African gold fields - *2nd APCOM Symposium, University of Arizona, Tucson, April 1962. (Volume 3...2)*

8. DGK08

Value contours and improved regression techniques for ore reserve valuations (jointly with Ueckerman) - *J.S.A.I.M.M., May, July and October 1963. Republished in the J. I. Mine Surveyors of S. A., September 1963, Volume. XII, No. 7. (Volume 2...1)*

9. DGK09

Recent developments in South Africa in the application of trend surface and multiple regression techniques to gold ore valuation - *4th APCOM Symposium, Colorado School of Mines Quarterly Volume. 59, No. 4, October 1964. (Volume 2...4)*

10. DGK10

Two-dimensional weighted moving average trend surfaces for ore valuation - *J.S.A.I.M.M., Special Symposium Volume, p.13, March 1966, also April 1967, pp. 472/4. (Volume 2...7)*

11. DGK11

Ore value trend surfaces for the South African gold mines based on a weighted moving average - *6th APCOM Symposium, Penn. State University, April 1966. (Volume 3...4)*

20a*. Discussion on 20 by Matheron G: Kriging or Polynomial Interpolation Procedures. – *Canadian Min. and Met. Bulletin, Sept 1967, pp 1041/1045. (Volume 3...4)*

12. DGK12

A study of gold and uranium distribution patterns in the Klerksdorp goldfield - *Geoexploration* 4, pp. 43/53, 1966. (**Volume 2...6**)

13. DGK13

A review of some conceptual and practical implications of the use of valuation surfaces for gold ore reserve estimation, (jointly with Munro) - *Can. Inst. M.M., special Volume. 9*, 1968. (**Volume 3...5**)

14. DGK14

The use of contour surfaces as predictive models for ore values (jointly with Watson and others) - A decade of Digital Computing in the Mineral Industry, SAIME, Port City Press, Baltimore, 1969, pp.127/161 (8th APCOM Symposium, Salt Lake City). (**Volume 2...18**)

15. DGK15

Some implications of the new assistance formula for South African gold mines, *J.S.A.I.M.M*, May and August 1968, and February 1969. (**Volume 2...14**)

16. DGK16

The impact of taxation systems on mine economics - *Can. I.M.M., Special Volume. 12*, 1971, 9th APCOM Symposium, Montreal, Canada, 1970. (**Volume 3...10**)

17. DGK17

Capital investment and risk analysis for a new mining project - *Journal of the Investment Analyst Society of South Africa*, November 1972. (**Volume 3...11**)

18. DGK18

Computer applications in investment analysis, ore valuation and planning for the Prieska Copper mine - 11th APCOM Symposium, Tucson, Arizona, April 1973. (**Volume 3...12**)

19. DGK19

The fitting of contour surfaces to hanging and footwall data for an irregular ore body, (jointly with Rendu) - *13th APCOM Symposium, Clausthal-Zellerfeld, West Germany, October 1975. (Volume 2...19)*

20. DGK20

Some basic considerations in the application of geostatistics to gold ore valuation - *J.S.A.I.M.M, April 1976, pp.383/. (Volume 3...14)*

21. DGK21

The evaluation of co-product uranium reserves on producing and potential new gold mines in South Africa - *Evaluation of uranium resources, International Atomic Energy Advisory Group, December 1976, Rome. Published in Evaluation of Uranium Resources, IAEA, Vienna, 19. (Volume 3...15) and (Volume 4...14)*

22. DGK22

The human element in APCOM's development - *Keynote address for 15th APCOM Symposium, Brisbane, Australia, July 1977, Proceedings published by the Australasian Inst. Min. Met, 1977. (Volume 3...16)*

23. DGK23

An analysis of the potential benefits to the State of realistic adjustments to the mining tax structure-*J.S.A.I.M.M, July 1979. (Volume 4...19)*

24. DGK24

Some novel features and implications of a general risk analysis model for new mining ventures - *S.A.I.M.M Colloquium, 4 May 1979; J.S.A.I.M.M, October 1979. (Volume 4...23)*

25. DGK25

Threshold rates of return on new mining projects as indicated by market investment results (jointly with J. Austin) - *S.A.I.M.M Colloquium, 30 May 1980 - J.S.A.I.M.M, October 1980. (Volume 6...4)*

26. DGK26

Studies of the effects of outliers and data transformation on variogram estimates for a base metal and gold ore body (jointly with E.J. Magri) - *Mathematical Geology*, Volume. 14, No. 6, 1982, pp.557/563. **(Volume 6...7)**

27. DGK27

Geostatistical case studies of the advantages of lognormal-de Wijsian kriging with mean for a base metal mine and a gold mine (jointly with E.J. Magri) - *Mathematical Geology*, Volume. 14, No. 6, 1982 pp.547/555. **(Volume 6...8)**

28. DGK28

Gold mine productivity as affected by the average wet bulb temperature of the underground working places (jointly with C. P. Barnard) - *J.S.A.I.M.M*, May 1981, pp. 117/121. **(Volume 6...9)**

29. DGK29

Geostatistics and the definition of uncertainty - (Sir Julius Wernher Memorial Lecture, I.M.M 26. 3.1984) - *Trans. Inst. Min. Metall.* (Sect. A), Volume.93, 1984, pp. A41/47. **(Volume 6...11)**

30. DGK30

The use of geostatistics in defining and reducing the uncertainty of grade estimates - *Trans. Geol. Soc. S. Afr.* 88 (1985) pp. 69/72. **(Volume 6...12)**

31. DGK31

Letter on 'Matheronian Geostatistics' - 1986. **(Volume 6...15)**

32. DGK32

Estimating grade differentials from drilling results on new gold properties. *20th APCOM Symposium, Johannesburg, S.A.I.M.M., October 1987.* **(Volume 7...3)**

33. DGK33

Early South African geostatistical techniques in today's perspective. (Jointly with Guarascio and Camasani-Calzolari). *3rd International Geoostatistical Congress, Avignon, France, Sept, 1988. (Volume 7...5)*

34. DGK34

A-priori parameter distribution patterns for gold grade in the Witwatersrand basin to be applied in borehole evaluations of potential new mines using Bayesian Geostatistical techniques. *22nd APCOM, 1990, Berlin, pp.715-726, - jointly with Kleingeld and Oosterveld. (Volume 7...6)*

35. DGK35

New developments in borehole valuations of new gold mines and undeveloped sections of existing mines, (jointly with Assibey-Bonsu). *J.S.A.I.M.M., March 1992, Volume.92, No. 3, pp. 71/77 - 65*. (Volume 7...8)*

36. DGK36

Kriged variances fatally flawed – *Sept. 1992, The Northern Miner Magazine.*

37. DGK37

The relative rating of macro kriging and other techniques as applied to borehole valuations of new gold mines, (jointly with Assibey-Bonsu). *Proceedings 23rd APCOM, Tucson, 1992, chapter 23 -- 66. (Volume 7...9)*

38. DGK38

Variability in gold grade and spatial structures of Witwatersrand reefs; the implications for geostatistical ore valuations. *J.S.A.I.M.M., March 1993, pp 79/84. (Volume 7...10)*

39. DGK39

The role of massive grade databases in geostatistical applications in South African gold mines, (jointly with C.E. Dohm). *Geostatistics for the Next Century, (in honour of M.David)*. Kluwer Academic Publishers, Montreal, 1994. **(Volume 7...11)**

40. DGK40

An analysis of some essential basic tenets of geostatistics not always practised in ore valuations. Keynote address, *First Regional APCOM, Slovenia, June, 1994*. **(Volume 7...12)**

41. DGK41

A basic perspective on the roles of classical statistics, data search routines, conditional biases and information and smoothing effects in ore block valuations. *International Conference on Mining Geostatistics, Kruger National Park, Sept. 1994*. Unisa Publishers, 1996. **(Volume 7...13)**

42. DGK42

Some practical aspects of ore reserve estimation at Chuquicamata Copper Mine, Chile, (jointly with P.G. Dunn). *25th APCOM, Brisbane, Australia, July 1995*. **(Volume 7...14)**

43. DGK43

A practical analysis of the effects of spatial structure and data available and used, on conditional biases in ordinary kriging - *5th International Geostatistics Congress, Wollongong, Australia, 1996*. **(Volume 7...16)**

44. DGK44

Block Kriging and the fallacy of endeavouring to reduce or eliminate smoothing. Keynote address, *2nd Regional APCOM Symposium, Moscow State Mining University, August 1997*. **(Volume 11...2)**

45. DGK45

Essential basic concepts in mining geostatistics and their links with geology and classical statistics. *Geo-Congress 1998, Pretoria, South Africa, July 1998. South African Journal of the Geological Society of South Africa, Volume.102 (2) 1999, pp 147-151. (Volume 11...3)*

46. DGK46

The use of the Principal Components technique to define anisotropy details for spatial structures. *APCOM'99 International Symposium, Colorado School of Mines, Golden, October 1999. (Volume 11...5)*

47. DGK47

Conditional Bias and Uncertainty of Estimation in Geostatistics. Keynote address for *APCOM'99 International Symposium, Colorado School of Mines, Golden, October 1999. (Volume 11...6)*

48. DGK48

Use of Direct and Indirect Distributions of Selective Mining Units for Estimation of Recoverable Resource/Reserves for New Mining Projects, (Co-author with W. Assibey-Bonsu). *APCOM'99 International Symposium, Colorado School of Mines, Golden, October 1999.*

49. DGK49

Practical problems in the estimation of recoverable reserves when using Kriging or Simulation Techniques. (Jointly with co-author W. Assibey-Bonsu). *International Symposium on Geostatistical Simulation in Mining, Perth Australia, October 1999. (Volume 11...8)*

50. DGK50

The South African Code for reporting of mineral resources and mineral reserves and the geostatistical implications involved (as co-author with Camasani): *6th International Geostatistics Congress, April 2000, South Africa. (Volume 11...9)*

51. DGK51

Limitations in accepting repeated simulations to measure the uncertainties in recoverable resource estimates particularly for sections of an ore deposit (jointly with Assibey-Bonsu). 6th *International Geostatistics Congress, April 2000, South Africa. (Volume 11...10)*

52. DGK52

Half a century of geostatistics from a South African perspective. Keynote address, 6th *International Geostatistics Congress, April 2000, South Africa. (Volume 11...11)*

53. DGK53

The SAMREC code seen in a global context, jointly with Camasani. *APCOM2001, Beijing, China, April, 2001. (Volume 11...12)*

54. DGK54

Valuation of recoverable resources by kriging, direct conditioning or simulation, *APCOM 2001, Beijing. April, 2001. (Volume 11...13)*

55. DGK55

Comment on Journal's paper in *Mathematical Geology*, 2000, re a Spectral Postprocessor. *(Volume 11...14)*

56. DGK56

A classical statistical perspective on the birth and some critical developments of mining geostatistics. *UNISA conference in honour of Prof.F.Steffens, May, 2002. (Volume 13...1)*

57. DGK57

Mineral resource and reserve estimation. *AUSIMM Monograph No.23. Critique February 2002. (Volume 13...3)*

58. DGK58

An analysis of the practical and economic implications of systematic underground drilling in deep South African gold mines, Co-author with Assibey-Bonsu W. *31st International Symposium on Computer Applications in the Mineral Industry, Cape Town. Proceedings SAIMM, 2003, May 2003.*

59. DGK59

Some practical aspects of the use of lognormal models for confidence limits and block distributions in South African gold mines. *31st International Symposium on Computer Applications in the Mineral Industry, Cape Town. Proceedings SAIMM, 2003, May 2003.*
