

ISM TECHNICAL VIST TO

REUTECH MINING

21 SEPTEMBER 2026

REUTECH VISIT BACKGROUND:

Reutech Mining is a passionate company dedicated to developing, manufacturing and distributing innovative technologies for the management of safety within the mining industry. We have been at the forefront of technological innovation for mining safety for more than a decade.

Established in 2006 after being approached by industry leaders in the mining sector, who requested advanced geotechnical monitoring solutions. Since then, the company has focused on providing and improving real-time mine safety for surface- and underground applications, as well as contributing towards notable increases in the production output of a large number of mines globally.

Our reliable products are available on every continent, backed by outstanding support structures. Our mission is to understand the mining environment and deliver world-class products to the industry.
