

EX MENTE

ADVANCING THROUGH INSIGHT

UNLOCK VALUE AND ADVANCE WITH CONFIDENCE

Ex Mente is a technology solutions company specialising in pyrometallurgy, a vital and beautiful part of sustaining society. We are an independent company that helps clients solve complex problems by applying science and technology to improve the success and long-term sustainability of their operations.

Our value proposition is based on mutualism, symbolised by the honeyguide in our logo. Just as the honeyguide leads humans to beehives and, in return, is allowed to eat the larvae and beeswax, we guide our clients to effective solutions that help them unlock maximum value from their resources.

WE BELIEVE IN BUILDING A THRIVING
PYROMETALLURGICAL INDUSTRY BY PARTNERING WITH YOU.

HOW WE HELP YOU SUCCEED

We combine a **strong team, structured methods,** and **powerful tools** to help you make important decisions with confidence.

Operational Enhancement

We build user-friendly digital tools to integrated sophisticated metallurgical calculations into your plant to support your team to improve operational performance and solve difficult problems.

Team Empowerment

We actively share our knowledge during all projects and can provide customised training to equip your team for success.

New Technology Development

The metallurgical landscape is in flux, both locally and internationally. Legislation, raw material quality, energy prices, and market fluctuations all change what we need to do into the future. We guide our clients through these uncertain conditions based on structured engineering and fundamental scientific thinking.

Expert Consulting

We offer customised solutions for your unique needs, from refractory material choices and divising furnace design changes, and design reviews, to commissioning planning and process analysis. We also have experience acting as expert witnesses in legal proceedings.

WE CARE,
WE THINK,
WE CALCULATE.
