As a vertically integrated manufacturer, Victaulic produces what it sells from R&D to product concept and throughout the manufacturing and distribution process including bagging and tagging services.

The Victaulic Product Delivery System, which is based in the principles of lean manufacturing, focuses on ensuring that we manufacture products close to the markets we serve. This allows us to meet customers demands anywhere in the world.

DESIGN VERSATILITY

More options and easily accommodates system changes
System maintenance and installation completed
in 50% less time than other joining methods

VICTAULIC COUPLINGS

Style 177

Style 107

Style 905

Style 907 / W907

Style 904

HDPE COUPLING

Style 905

- Designed for plain ended pipe SDR 7 – 26
- 2 – 14 Inch / 63mm – 355mm
- 60 BAR
- Exceeds HDPE working pressure
- Joins HDPE or PE-RT pipe
- Orange for IPS sizes
- Black for ISO sizes
- Installation ready / no loose parts
- 316 Stainless steel retaining (gripper) ring
- All weather installation
- 10 times faster install times
- Grade “T” Nitrile Gasket
- Grade “E” EPDM Gasket
- Grade “EF” EPDM Gasket
- Grade “O” Fluoroelastomer Gasket

Style 905

HDPE TO STEEL TRANSITION COUPLING

Style 907 / W907

- Designed to join HDPE Pipe to Grooved Steel Pipe
- From 63mm – 355mm HDPE to 2 – 14 Inch Steel
- 60 BAR
- Also available for PVC to STEEL
- Orange for IPS sizes
- Black for ISO sizes
- Grade "T" Nitrile Gasket
- Grade "E" EPDM Gasket
- Grade "EF" EPDM Gasket
- Grade "O" Fluoroelastomer Gasket

Style 907 / W907
