ABOUT AGREENCO

We have more than 30 years of environmental stewardship experience committed to innovative solutions for a sustainable future. With a rich history in environmental management and a passion for transformative practices, we are dedicated to fostering a greener planet through science-based strategies and forward-thinking initiatives.

Our commitment to customer excellence drives us to develop, implement and sustain cutting edge projects that not only enhance ecological health but also support the local communities.

We proudly serve the following industries:

- Mining & Beneficiation
- Energy & Resources
- Industrial
- Forestry
- Manufacturing

EXECUTIVE SUMMARY

Agreenco is a trusted leader in environmental contractor services, with over 30 years of experience transforming landscapes, securing water and restoring ecosystems. Our passion lies in executing sustainable, nature-based solutions that address complex environmental challenges cost effectively.

We partner with customers across industries to deliver comprehensive, customized land and water stewardship strategies that focus on land, water, biodiversity, and sustainable land-use. From innovative dust control to mine closure, to water use optimisation, our expertise in environmental rehabilitation ensures long-term resilience and environmental harmony. At Agreenco, we don't just solve problems, we Action Environmental Results, to protect the planet, and build a sustainable future for communities and generations to come.

OUR SERVICES

ENGINEERING SERVICES

Agreenco leads the way in applied engineering for environmental rehabilitation, combining extensive in-field experience with a focus on practical outcomes. Our tailored solutions consistently impress customers and address their specific needs.

Our relationship-driven, customer-centric approach fosters close collaboration, ensuring we deliver exactly what our customers want while remaining cost-effective. We pride ourselves on achieving compliance while enhancing environmental sustainability.

By leveraging customised models, machine learning, and data mining, we position our services for success. We offer a comprehensive range of engineering services, including land use, water use, environmental, ecological, and dust control engineering. Our integrated approach provides holistic solutions for sustainable landscapes, clean water, and productive land.

Our engineering services include:

- Land use engineering
- Water use engineering
- Dust control engineering
- Environmental engineering
- Ecological engineering

LAND AND REHABILITATION SERVICES

Agreenco excels in land management services that prioritise environmental sustainability while delivering cost-effective compliance solutions. Our innovative planning minimises environmental impacts, ensuring projects align with best practices in preservation and infrastructure efficiency.

Through implementation, we create tailored strategies to optimise land use and enhance natural resources. Our proactive management approach involves continuous monitoring and adaptation to meet evolving environmental standards.

By combining cutting-edge techniques with a commitment to excellence, we protect the environment and provide sustainable solutions that drive long-term success for our customers.

Our engineering services include:

- Revegetation and hydroseeding
- Invasive plant and vegetation management
- Dust control
- Afforestation and bioremediation

WATER AND SANITATION SERVICES

Our comprehensive water management services are built on principles of sustainability and environmental stewardship. With expertise in surface and effluent treatment, groundwater remediation, and Biological Water Treatment, we deliver tailored solutions that promote long-term resource health.

Through innovative planning, cost-effective design, and precise implementation, our team ensures operational efficiency at every stage. Supported by registered process controllers and experienced water engineers, we uphold the highest maintenance and management standards to provide sustainable outcomes that protect ecosystems and advance our clients' environmental objectives.

Trust Agreenco for exceptional water management services that create lasting, positive impacts on your operations and the environment.

- Effluent water treatment
- Groundwater remediation
- Wetland reconstruction
- Dam and river reclamation

TURNKEY SERVICES

Dedicated to sustainable land rehabilitation and stewardship, our work reflects a deep commitment to environmental custodianship and the development of green economies. By integrating land and water resource management, we promote effective land use that supports both employment creation and long-term sustainability.

Specialising in land relinquishment strategies, we help reduce liability and enable effective project closure, contributing to resilient landscapes that serve both communities and ecosystems. Expertise in soil cover and capping ensures minimal environmental impact while creating a foundation for productive and sustainable land use.

Believing in responsible land custodianship, we foster stewardship that enhances ecosystem restoration and agricultural productivity. Our dedicated team combines landscape management with practical land use expertise to create economically viable solutions, evaluating and implementing land transition opportunities. By focusing on responsible relinquishment practices, we empower communities to thrive while restoring land health and productivity. With a results-orientated mindset, we deliver comprehensive solutions that meet our customers' land use objectives and contribute to a sustainable future for all.

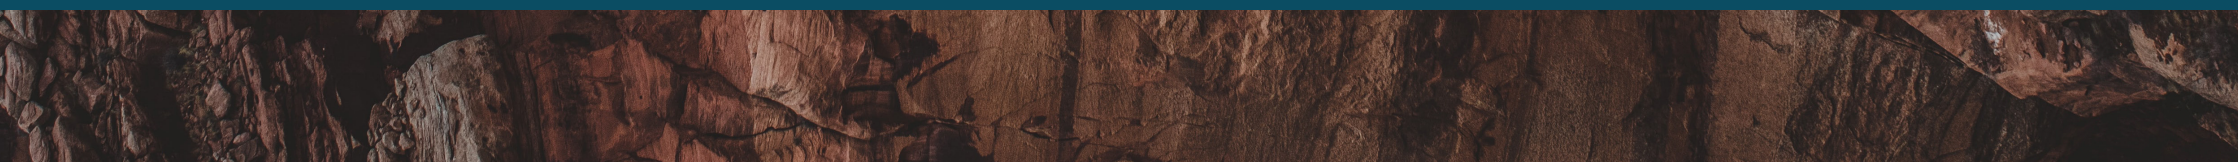

- Land stewardship
- Water liability
- Biodiversity
- Biomass
- Cover systems
- Footprint reduction

SUPPLY SERVICES

We provide efficient product supply as part of our end-to-end services at Agreenco. Customers and local partners can directly purchase our value-added products, and we actively participate in the design and management of our environmental infrastructure processes. Our primary goal is to support our customers' sustainability efforts with direct sales of proven products that deliver scalable environmental results. Our value-added services empower customers to achieve sustainable landscapes and maintain compliance.

We offer a range of cost-effective engineering and biological systems, collaborating with specialists to deliver impactful solutions. Our products include soil and water conservation systems, substrate nutrition enhancements, vegetation optimisation tools, and biodiversity products. We also provide large-scale water reticulation, stormwater control, groundwater protection, wetland reconstruction systems, and customised dust control and spontaneous combustion suppression products. With our experienced design and implementation teams, we ensure that every customised system is safely installed to meet our customers' expectations for operational peace of mind and sustainability compliance.

- Agricultural product supply
- Dust control systems
- Biodiversity improvement
- Soil erosion control
- Wetland reconstruction
- Water reticulation systems
