

Software for Mining Applications

About Rocscience

A world leader in developing innovative 2D & 3D software for civil, mining, and geotechnical engineers.

We are dedicated to delivering industry-leading software programs, exceptional customer service and unparalleled technical expertise that engineers can rely on.

Rocscience Around the Globe

Geotechnical tools, inspired by you.

Comprehensive

Rock & Soil | 2D & 3D |
19 Programs

Customer-Centric

Rocscience Software Ecosystem

Beyond the Software

Courses

Short courses covering various geotechnical subjects led by Rocscience experts

Webinars

Free webinars to stay up to date with the latest product features and applications

Customized Workshops

Workshops tailored to specific requirements of organizations

Expert Modelling

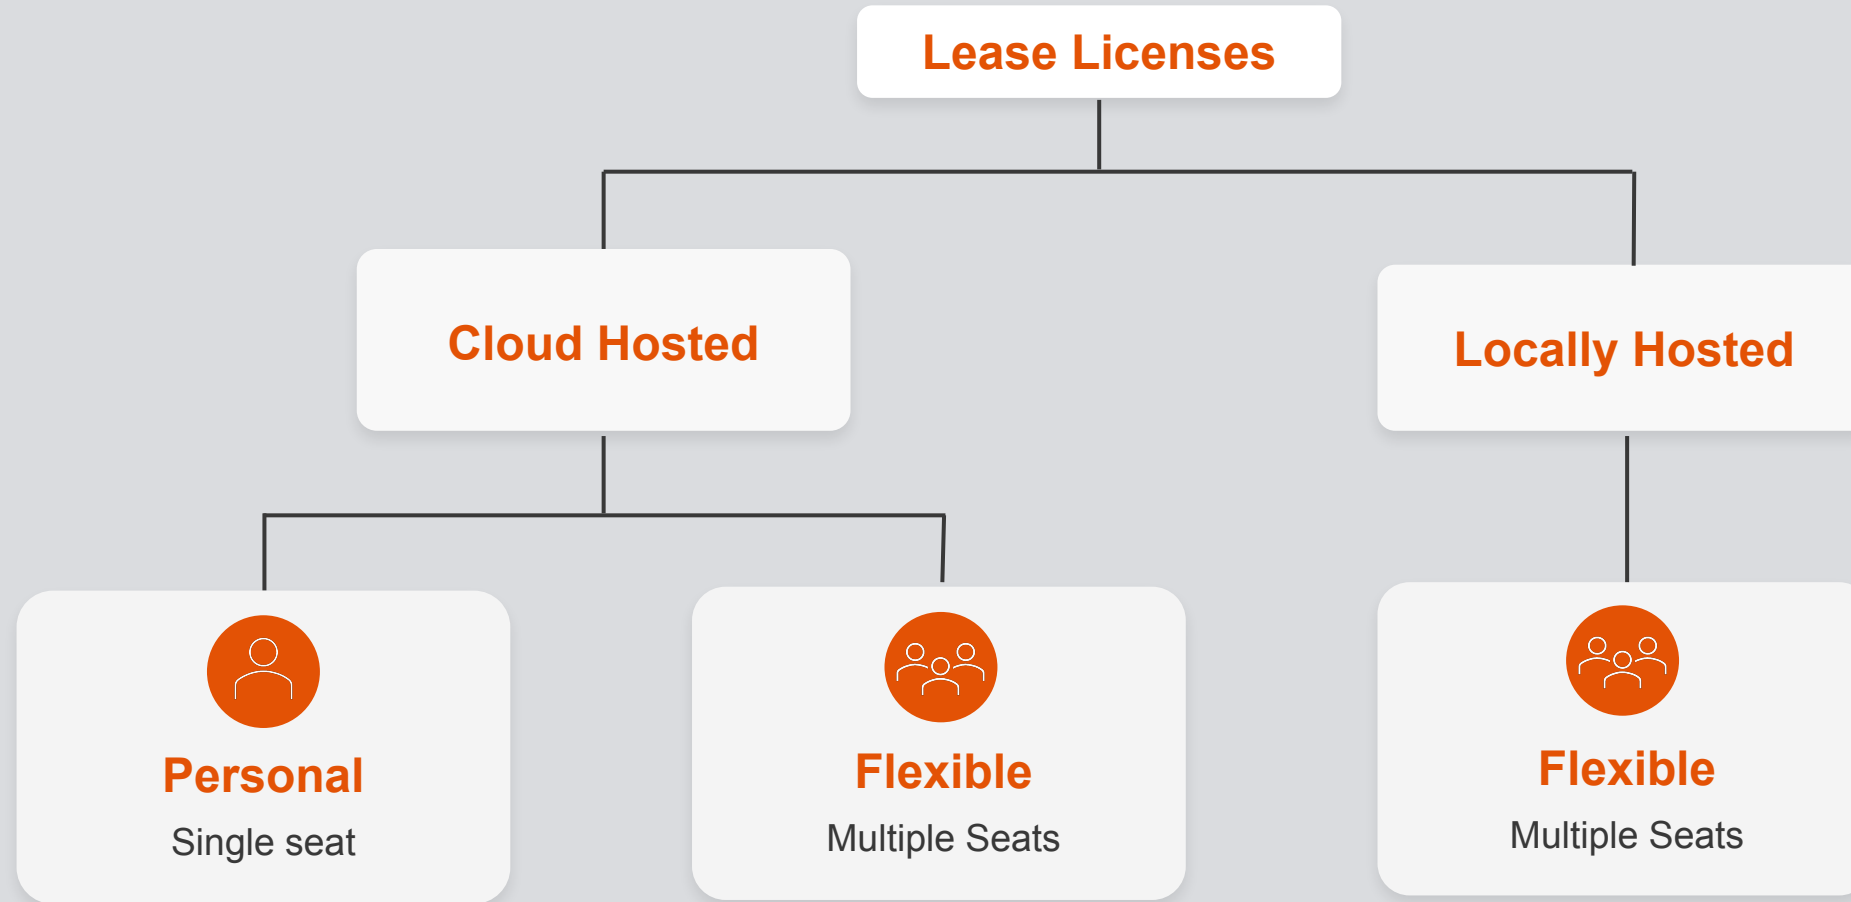

Our engineers model and analyze projects as per your specifications to provide the best insights

Rocscience International Conferences

A forum for engineers to network and share knowledge and ideas

License Types & Pricing

*Perpetual and locally-hosted-lease licenses can be purchased through our Sales representatives.
