

ESG Climate Change Webinar Series 2026

Date: 18 June 2026 | **Time:** 12:00-13:00 | **Online Webinar**

Topic:

Managing Climate Risk in an Uncertain World

BACKGROUND

As organisations deepen their understanding of greenhouse gas emissions and climate change impacts, the next challenge is turning that knowledge into practical action. This webinar explores how to identify, assess, and manage both transitional and physical climate risks in the face of policy, regulatory, and modelling uncertainty. It will highlight how integrating climate risks into site-based risk registers can strengthen decision-making, support decarbonisation and adaptation, and help organisations respond with greater confidence and resilience.

MODERATOR

Philippa Burmeister

Partner and Principal Scientist
SRK Consulting

Philippa Burmeister is a Partner and Principal Scientist with SRK Consulting. She is an expert in integrated environmental management with over 20 years of experience. She specialises in air quality and climate change adaptation. Dedicated to innovation and strategic planning, she has developed effective strategies for addressing climate change, environmental management, and sustainability.

SPEAKER

Ashleigh Maritz

Senior Manager for Sustainability at Ivanhoe
Mines

Ashleigh is Senior Manager for Sustainability at Ivanhoe Mines, with 17 years of experience across mining, infrastructure, energy, and government. Her expertise spans environmental, social, and climate risk assessment, sustainability reporting, lender and investor requirements, and strategic advisory across the full project life cycle. In her current role, she leads group sustainability efforts across major mining projects, supports ESG reporting and financing processes, and oversees the management of sustainability-related risks in line with regulatory and international best-practice standards.
