

An Effective Strategy for Decarbonisation

Date: 2 July 2025 | **Time:** 16:00-17:00 | **Zoom Webinar**

BACKGROUND

2030 is fast approaching and many organisations have set a decarbonisation objective to reduce baseline GHG emissions by 30% or more. A significant percentage of that objective can be achieved through the implementation of an effective energy management system.

During this interactive webinar, you will discover:

- The benefits to be realised through the implementation of an energy management system.
- Aspects to be aware of when implementing an energy management system.
- Why an energy management system is an effective decarbonisation strategy.

If you are looking to reduce energy costs, reduce GHG emissions and make tangible progress towards your decarbonisation objective, this is one webinar you do not want to miss.

SPEAKER

Andrew Cooper
SYNERGISE

[Andrew Cooper](#) brings a unique combination of both operational and strategic experience in energy and GHG management. He is an International Energy Manager of the Year award winner and the 2023 International Energy Innovator of the Year.

Andrew is a Senior Consultant with [SYNERGISE](#), which helps organisations be more sustainable by improving energy efficiency, reducing GHG emissions and engaging employees in the process. He has facilitated energy and GHG meetings and workshops with senior leadership of multi-national mining companies, consulted on energy and GHG reduction initiatives, developed and implemented energy management systems, and supported workforce capability building programs through training and coaching.

He initiated and led the first implementation of ISO 50001 at a mine in North America, helping the mine realise energy savings of more than 15% of the annual energy use. The

mine received several national and international awards for Andrew's energy and GHG management initiatives.

An energetic, entertaining and thought-provoking speaker, who has received many positive reviews, Andrew has been invited to be a keynote speaker and presenter at events in Canada, USA, Chile, Argentina, South Africa, Finland and the UK. He has also been invited to be a guest on several podcasts.

Andrew is a Professional Engineer, a Certified Energy Manager, a 50001 Certified Professional, a Certified Industrial Energy Professional, and a Towards Sustainable Mining (TSM) Verification Services Provider. In addition, Andrew has served on energy and climate change related working groups for various mining associations.

Interesting, informative and insightful articles by Andrew, on energy and GHG management, can be viewed at his monthly Energy Matters Newsletter, on LinkedIn. For more information on Andrew, please go to <https://www.linkedin.com/in/andrewcooperenergy/>
