

GMG-SAIMM JOHANNESBURG FORUM

Exploring the future of mining through innovation and sustainability

17-18 MARCH 2026

191 OXFORD RD, ROYAL MAJESTIC HOTEL,
ROSEBANK, JOHANNESBURG

Kick off 2026 with the first GMG Forum of the year – a dynamic, hands-on gathering where the global mining community comes together to collaborate, innovate, and shape the next phase of mining transformation.

GMG's **Johannesburg Forum** isn't just another conference – it's a working event where mining operators, OEMs, OTMs, technology providers, and researchers tackle real challenges, share lessons learned, and co-create solutions that make mining **safer, smarter, and more sustainable**.

THEMES INCLUDE:

- **Driving a Low-Carbon Future** – Real pathways to decarbonization and sustainable operations
- **Intelligent Mining** – Turning data and AI into decisions that deliver real value
- **Safety & Resilience** – How technology is transforming workforce safety and reliability
- **Underground Transformation** – The future of automation and autonomy underground

This highly interactive forum blends case studies, panels, and open discussions focused on sharing lessons learned, exploring innovation, and co-creating the next steps in mining's transformation.

WANT TO SPEAK?

We're looking for innovative, real-world stories that showcase progress, lessons learned, and practical applications of technology and collaboration in mining.

If you've led a project, piloted a new solution, or have insights that could help others navigate change, we'd love to hear from you.

To express interest or propose a topic, email lfoley@gmggroup.org with a short description of your idea.

Don't miss your chance to be part of the conversation shaping the future of mining in South Africa.

Details and registration coming soon!
